

Do NOT rescind NJ's Do-Not-Call Act. Our telephone is intended for family and personal use. This intrusive device is tolerated because of its importance to us as a communications device enabling a realtime dialog for reasons that we choose, not as dictated by commercial enterprises. Especially with the advent of email, there is no shortage of avenues of non-intrusive communications for businesses to use. The citizens of NJ would like their wishes followed; the FCC need not get involved.
